

Hard Cheese Grater

Olimpo E/2.0

The Olimpo E/2.0 is a reliable, heavy-duty industrial 2hp cheese grater ideal for large operations. It is designed for restaurants and delis that need to grate hard cheese or bread quickly and without waste. The anti-corrosive aluminium alloy body and grating mouth are designed for easy and fast cleaning.

The grating drum is made of stainless steel for long-lasting performance and has 1/16" teeth to always deliver a fine, perfectly grated product. The gear-driven motor easily processes the toughest products. The 2hp heavy-duty motor is fan cooled for efficiency. A safety interlock prevents the machine from starting when the feeder handle is not lowered enough, and stops the machine when the lever is lifted.

Approvals:

- ETL Approved to (UL Std. 763)
- ETL Approved to (NSF-8)
- CSA Std. C22.2 N. 195
